

/ Arene Mk II Rise & Recline Chair

Having worked closely with hospices for a number of years, we've learnt a lot about what they and their patients require in seating. Whereas all other seating has been blinkered and focused solely on the medical needs of the patient, we've gone leaps beyond and looked at how we can make seating as easy as possible for caregivers, as well as improving quality of life for the user.

We've married the patient's medical needs with their lifestyle needs to create the Arene Mk II, which boasts a range of features that will help hospices and other facilities keep patients happier and comfier in what can be particularly difficult stages of life.

Not only does the Arene Mk II deliver exception comfort, positioning and postural support, it also looks incredible. With a new streamlined design, the Arene Mk II is modern, stylish, and sophisticated in any environment.

UPHOLSTERY CHOICES

The Arene Mk II can easily be customised to suit any decor thanks to the wide variety of upholstery and vinyls available. With a Dartex covering on the seat areas, the rise and recline chair is easy to wipe down. The outer parts of the chair (including the armrests) are upholstered in a different colour, with a contrasting stripe running from the base of the armrests all the way up to headrest.

/ Arene Mk II Rise & Recline Chair

MODEL OPTIONS:

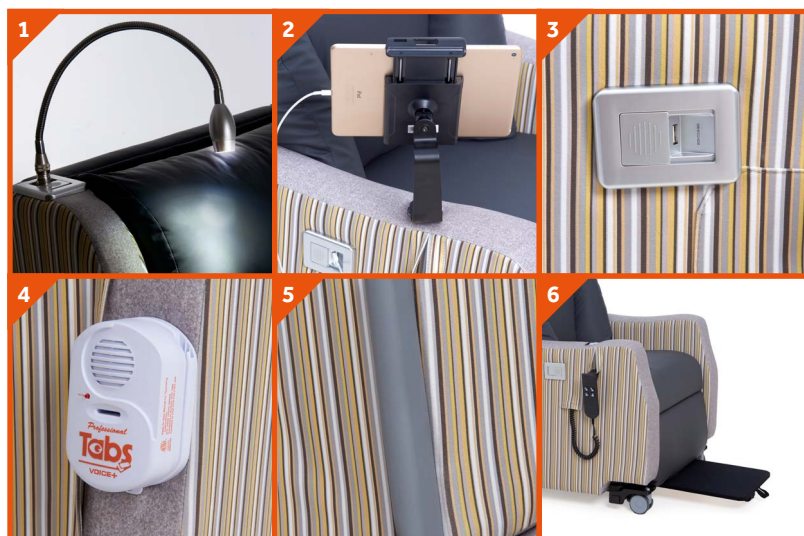

- **Arene Mk II Standard:** A stylish rise and recline chair designed for even the toughest of environments.
- **Arene Mk II Mobile:** This model has large wheels and a push handle to enable patients to be wheeled from room to room.
- **Arene Mk II Bariatric:** The perfect rise and recline chair for bariatric clients.

ARMREST OPTIONS:

- **Contemporary:** Modern sculpted armrests, with a soft flat top to ensure patient's arms don't slip off, and are correctly cushioned and supported.
- **Drop Arms:** These drop arms lower at the press of a button to enable side transfers.

BACKREST OPTIONS:

- **Contemporary Backrest:** A sleek, modern backrest with some lumbar support. The neck cushion option comes as standard with this backrest.
- **Waterfall Backrest:** A soft backrest with adjustable cushions. Not recommended for use with the Drop Arm armrest option.
- **Lateral Backrest:** Offers soft lateral support. Not recommended for use with the drop arm armrest option.
