ROLE PROFILE

About Us:

Established in 2008, Innova Care Concepts provide the most innovative healthcare equipment and furniture to improve clinical outcomes and enhance wellbeing. With over 200 combined years of experience in this sector, the Innova team are passionate about ensuring caregivers and patients have the finest equipment available.

The role is a fantastic opportunity to support the Operations team, reporting into the Department Head of Design the role is responsible for the creation of all the design work for all projects and enquiries from the sales and project delivery teams throughout Innova Care Concepts.

Candidates must be prepared to work extra hours when workload and priorities dictate

DUTIES

The role will include, but not be limited to, the following duties and responsibilities:

We are looking for a creative and motivated, confident self-starter who has experience of working across a range of design activities within a fast-paced healthcare equipment environment.

- Adhering to the company guidelines and best practice throughout the design process.
- Work within both time and commercial restraints to produce solutions which meet the Scope of Work and requirements of the scheme/project.
- Thoroughly appraise received project documentation to identify risk, opportunity, insufficient information, inadequate or incorrect design and compliance.
- Primarily working in the Fixtures and Fittings market, space planning of furniture and fixed equipment.

Contact

- The business has over 150 projects of various sizes on the go at a time so you will be required to manage and prioritise your time across the different projects to ensure deadlines are met.
- You will need to attend, and where requested, lead design meetings along with the sales representatives or project managers.
- Upload drawings onto contractors' databases such as 4P ensuring the documents are properly titled to the contractors' standards.

Responsibilities

- All the design work should be carried out in accordance with the relevant building regulations.
- Adhere to the company Integrated Management System processes and procedures.
- Ensure a robust drawing control process is maintained with revision control and distribution.
- Operating AutoCAD and Revit, produce any required technical documents.
- Work within the necessary BIM lv 2 guidelines to maintain compliance.

SKILLS AND EXPERIENCE

What you'll need:

- Ability to communicate with a range of people at all levels, both verbally and in writing
- Competent user of MS packages e.g. Outlook, Excel, Word (essential)
- Experience in construction, engineering or professional design role
- A developed technical construction knowledge
- Familiarity within a design office
- Being able to think methodically and to manage projects
- Ability to liaise with professionals and management of the design
- Ability to interpret client requirements and communicate these requirements to others
- Good understanding of the CDM Regs 2015 and BIM Standards
- Time keeping and commitment to company demands
- Professional when representing the company
- Demonstrates consistent drive and personal motivation
