| Job Title | Healthcare Equipment - Skilled and Semi Skilled Installer |
| Department | Project Delivery |
| Reports to | Senior Project Manager |
| Status / Type | Full-time |
| Direct Reports | None |
| Days | Monday – Friday, hours to suit site projects (approx. 50h per week) |

Role Overview

A great opportunity to join a rapidly growing family business who are looking for skilled and semi-skilled installers. Reporting to the Project Managers you will be responsible for the installation of assisted living equipment. Working on construction sites and in domestic environments all over the UK. Key installations will consist of 1st fix into building structures and 2nd fixing assisted living equipment. First fix M & E installation related to containment, pipework and ducting has very similar skill sets and would be a good definition of the majority of work we are engaged in with a higher level of skill and attention to detail. As a member of a 2 man team, initially with one of our experienced installers, you will have the opportunity to progress to your 'own' team.

Key Duties

- Installation of assisted living equipment in an approved manner to meet industry standards and testing criteria.
- Be accountable ensuring any job is completed to the highest standard, and within the time allocated.
- To ensure all Health & Safety standards are met and risk assessment and method statements are always adhered to.
- Manage time effectively ensuring urgent requests are responded to immediately.
- Develop a sound technical knowledge of the product ranges supplied.
- Attending sites throughout the UK to install assisted living equipment. These sites mainly consist of construction sites and private properties.
- Communicate with team members to listen to the required works and confirm understanding.
- Represent the client's and Innova's best interests at all times.
- Lead by example in view of gaining respect from other team members.

Essential Selection Criteria

- Construction site experience with ability to work in domestic premises.
- Knowledge of assisted living equipment/environment preferred but not essential.
- Best suited to a trade background with 1st fix installation experience such as pipework, containment, ducting.

JOB DESCRIPTION

- Must be willing to stay away during the week as this is a working away role.
- Accurate information collation and creation.
- Ability to follow instructions and communicate with peers, understand layout drawings and installation instructions.
- Ability to work to deadlines
- Possess excellent time management skills.
- Must be self-motivated.
- Full training will be given.

Qualification / Certificates / Licenses

- CSCS Card (preferred)
- SSSTS/SMSTS (skill workers)
- IPAF/PASMA (not essential)
- Driving License

Benefits

- Salary £27,500 – £40,000 with OTE in the region of £50,000
- 25 Days holiday (excluding bank holidays)
- Good quality accommodation and a meal allowance are provided when required.
- Contributory company pension in line with government requirements
- Progressive training
- Use of company van and tools for the skilled installers
