

# HydroSpace

Hydrotherapy at Home

## Enjoy The Holistic Benefits of Hydrotherapy In The Comfort Of Your Home

The HydroSpace combines the joy of hydrotherapy and aquatic activity with at-home convenience. Our HydroSpace can adapt to almost any aesthetic, and being modular in design you'll be able to sit back and relax as the majority of the build is done off site.

Its customisation allows you to make this space your own - designed for all your family needs. A special retreat at the bottom of the garden to enjoy benefits of movement in water... and the results you get from using it!

# The Benefits of a HydroSpace

- Compact, modular construction ensures speed and ease being quick to install and causing minimal disruption. You can also relocate the HydroSpace as they are built to last - steel frame and robust structure enables them to be craned into position numerous times while still retaining its structural integrity.
- Economical to use year-round, thanks to its energy efficient plant system and compact structure.
- Beautiful because you determine the aesthetic. Choose from Mini or Max models, with a range of numerous finishing options to suit your taste and budget. You can also add additional features like jets, lights, music, wi-fi, changing bench and hoisting.

\*Applies in majority of cases, however is subject to any permitted development already carried out

Produced Off Site - Very Quick Installation Time

No Planning Permission Required\*

Short Lead Times for Standard Units

Inclusive of Stainless Steel Hydrotherapy Pool

Fully Integrated Plant System

External Cladding Options for Sympathetic Integration with Existing Buildings

Relocatable Structure Ensures the Asset Can be Moved to Future Properties

Fully Building Regulation Compliant

## HydroSpace Mini

### Specifications:

- 2m x 2m swimming area
- 1.1m water depth
- Modular Building Area - 6.2m x 4.7m x 2.5m with external Envirobuild Hyperion Pioneer composite cladding, 2 x 2.1m x 400mm windows, Double UPVC doors, 2 x Up/Down Lights
- Internal Building Spec - Bushboard Nuance Moisture Resistant Wall Cladding with 6 x LED spotlights & Alphashade 20 blind for privacy
- 3 x Stainless Steel 150mm x 150mm water outlet traps
- Pool shell to be complete with 1 x LED light, 1 x venturi jet, 2m hand rail & vertical steps either side of the pool
- Manually operated wall mounted foam pool cover

- High-efficiency circulating pump
- Skimmer filter (removable-cartridge type)
- 6 kW electric heater
- Single-Phase connection - power supply required

### Options:

- Hoist access - ceiling hoist or dipper hoist
- Sensory equipment - lighting, music, aroma, projectors
- 600mm canopy
- Changing area with shower & changing bench
- Broadband

## HydroSpace Max

### Specifications:

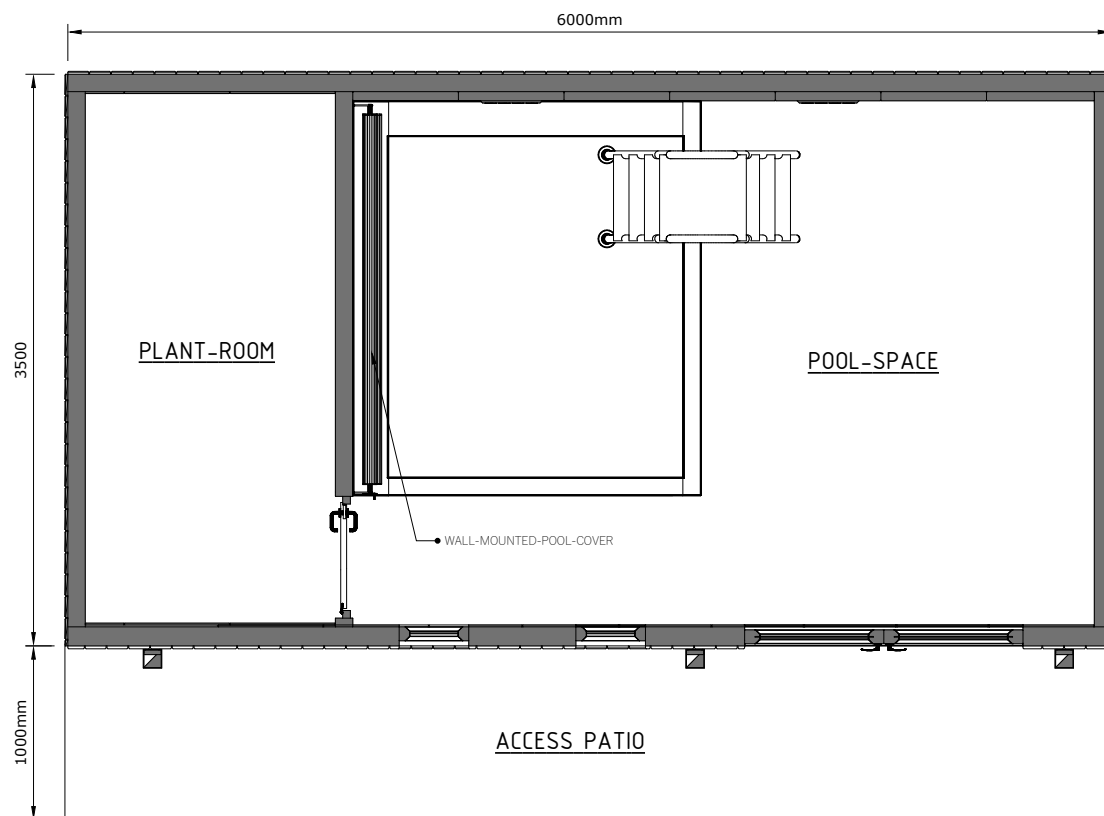

- 3m x 2m swimming area
- 1.1m water depth
- Modular Building Area - 7.7m x 4.7m - 2.5m with external Envirobuild Hyperion Pioneer composite cladding, 2 x 2.1m x 400mm windows, Double UPVC doors, 2 x Up/Down lights
- Internal Pod Spec - Bushboard Nuance Moisture Resistant Wall Cladding with 8 x LED spotlights & Alphashade 20 blind for privacy
- 3 x Stainless Steel 150mm x 150mm water outlet traps
- Pool shell to be complete with 1 x LED light, 2 x venturi jets, 3m hand rail & vertical steps either side of the pool
- Manually operated wall mounted foam pool cover

- High-efficiency circulating pump
- Skimmer filter (removable-cartridge type)
- 6 kW electric heater
- Single-Phase connection

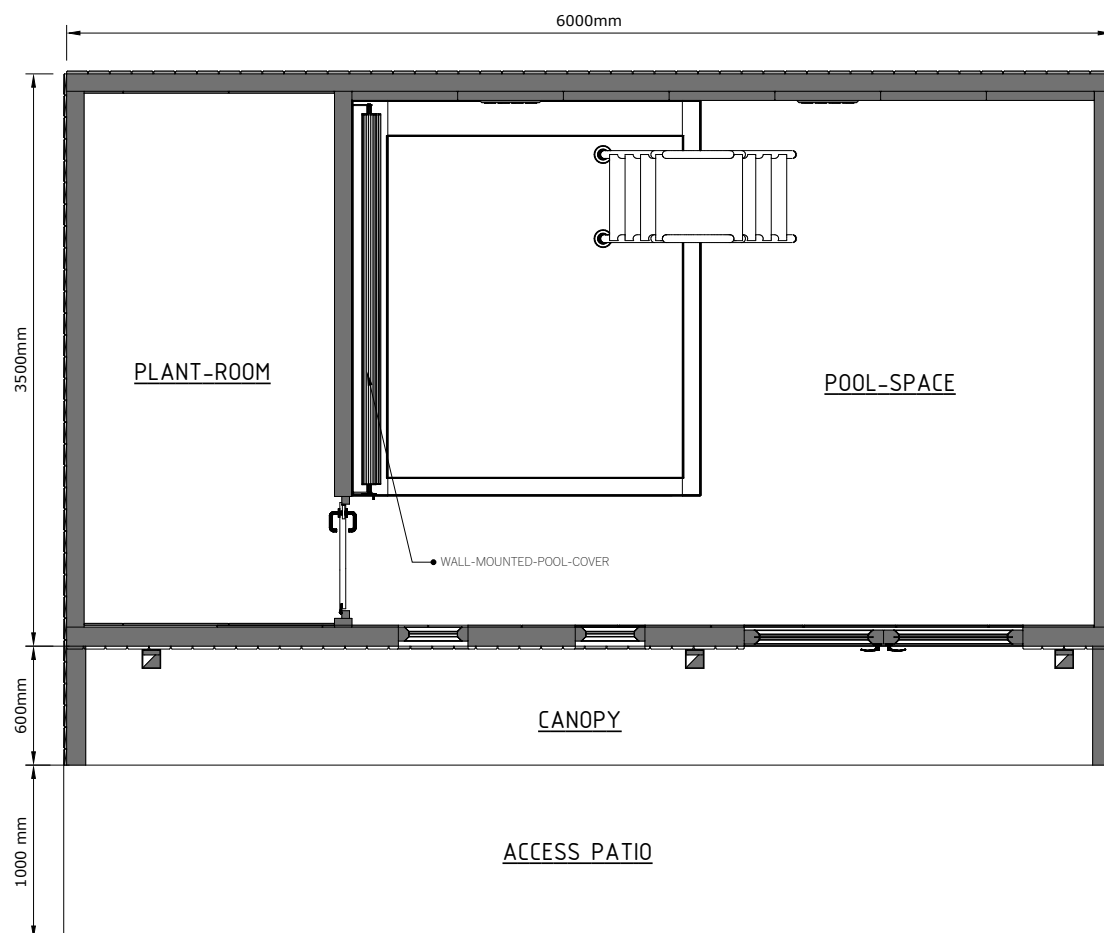

### Options:

- Hoist access - ceiling hoist or dipper hoist
- Sensory equipment - lighting, music, aroma, projectors
- Changing area with shower & changing bench
- Broadband

## External and Internal Options

Our HydroSpace Mini and Max both offer a wide range of different external and internal finishes to match your environment. Choose from an array of finishes for external cladding, internal waterproof panels and flooring, to create a bespoke space to suit your needs. We also offer options for customising your pool with additional features to suit your therapy needs. Once you have selected your options, we can prepare 3D visualisations for you to view before the project progresses to the build stage.

### Cladding

The HydroSpace's innovative, cladding system is made almost entirely from recycled material and does not splinter. It is produced using 100% renewable energy, making it safe for you and your family to enjoy.

As the low maintenance cladding does not rot and never needs to be treated, you save every year over standard wood products.

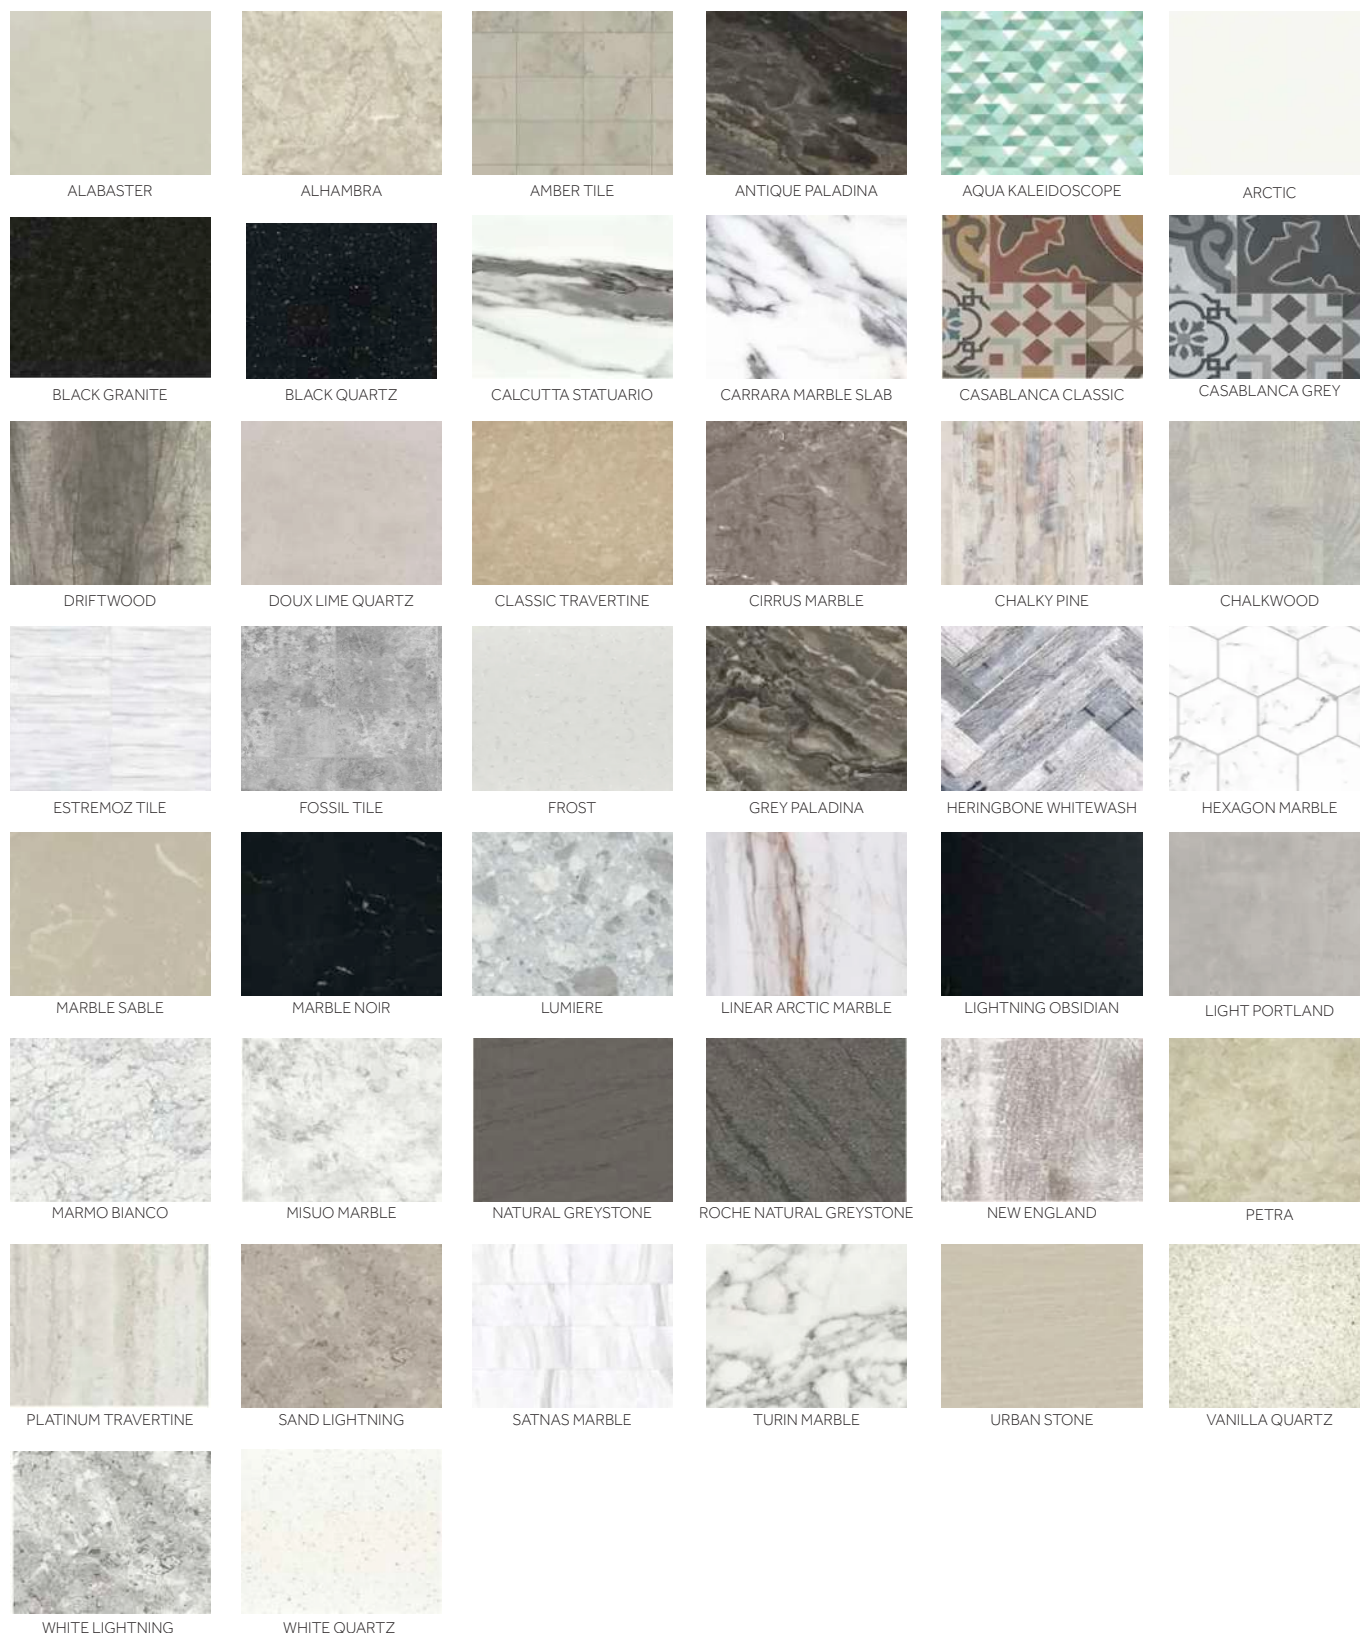

## Internal Wall Panels

We offer a contemporary collection of elegant, cool and relaxed colours with wood, textile glass and matte finishes. These subtle colour harmonies help you create a space that is perfect for a therapeutic care environment. Not only do they provide pleasing aesthetics, but they are also easy to clean, fully waterproof and guaranteed to last. This extensive range is an award winning bathroom wall panel system for use in showers, wetrooms and around the bath, with an 100% waterproof guarantee.

## Flooring

The HydroSpace's selection of floor tiles reflects a wide range of natural materials from classic pale to contemporary dark stone to help you achieve high contrast and design flexibility. Easy to clean and equipped with anti-slip technology, it has been extensively tested with a variety of shoes and contaminants to ensure top performance in high-risk environments.

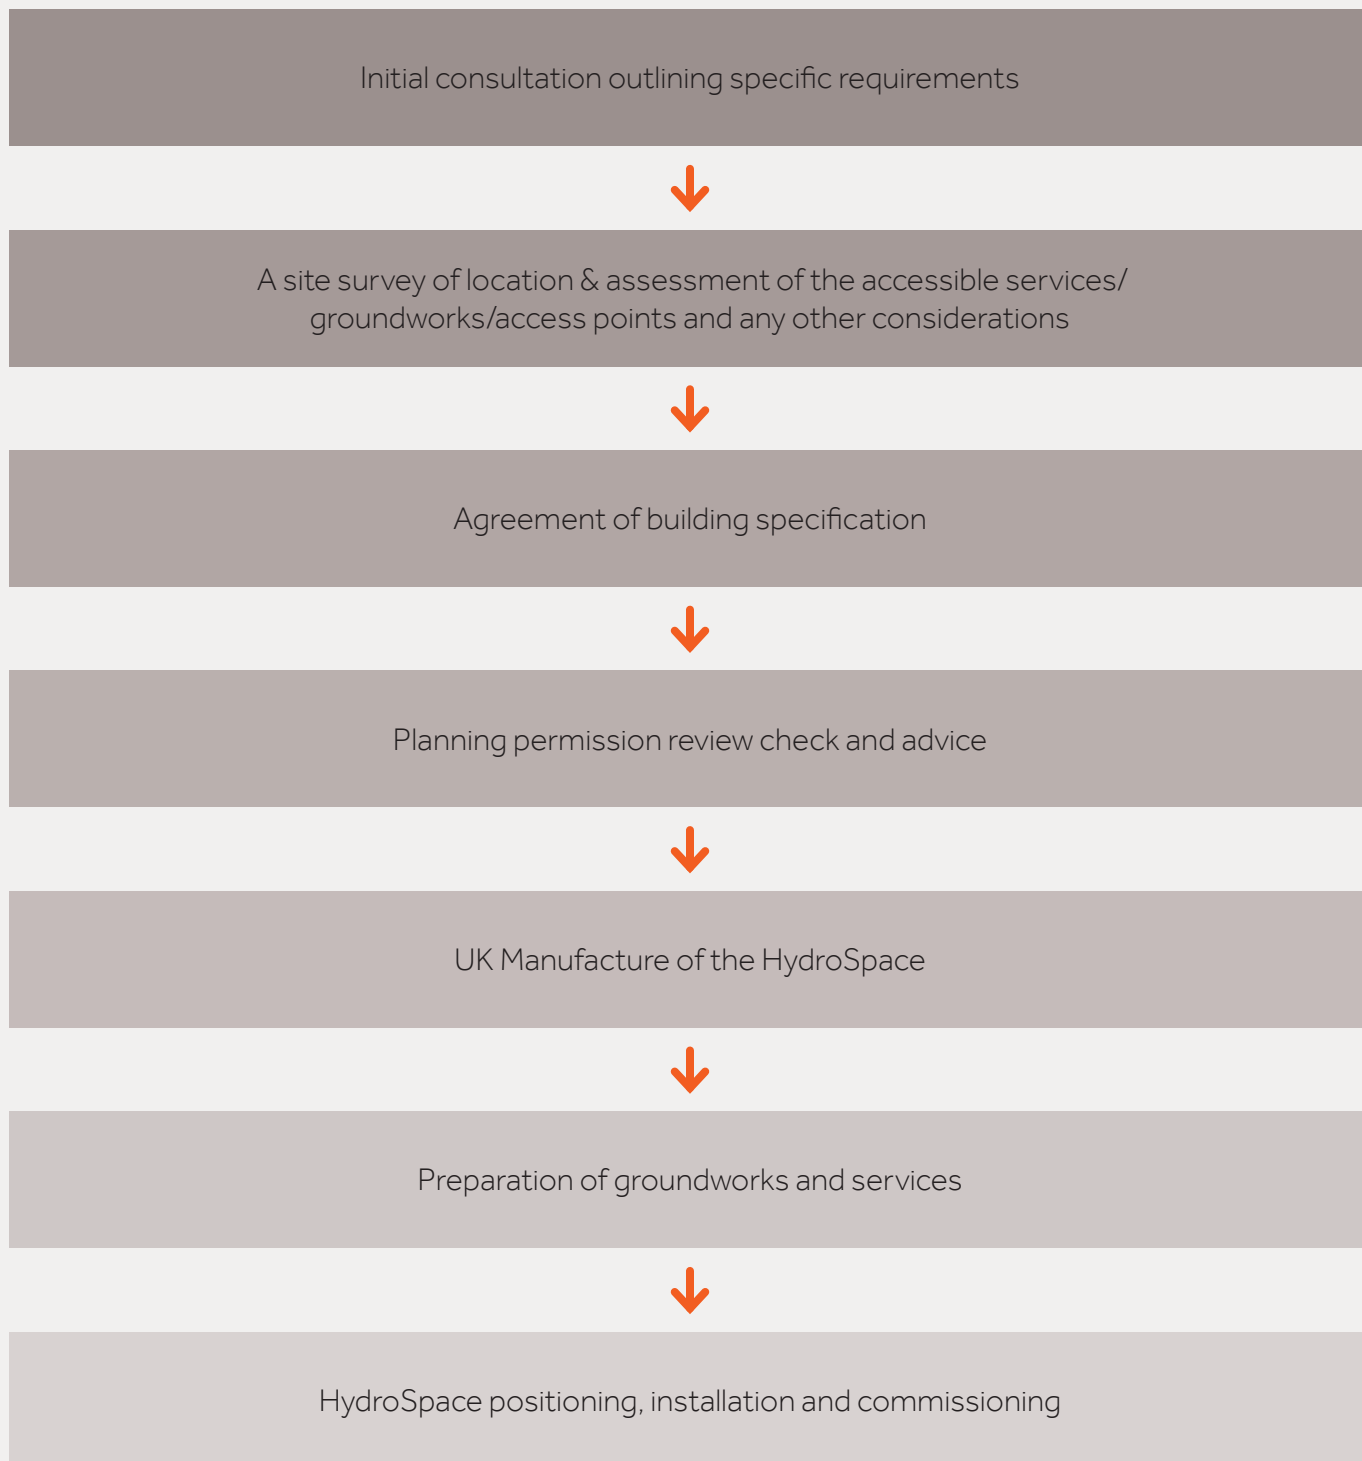

# HydroSpace Process

The process to ordering couldn't be simpler:

## Complete Building Support Services

- Planning and delivery
- Design and space planning
- Project management
- Fitting out
- Groundworks
- Delivery and installation
- Testing
- Commissioning
