INNOVATION

/ Welcome

WHEN IT COMES TO LITIGATION PROJECTS, INNOVA CARE CONCEPTS REALLY COMES INTO ITS OWN.

Our breadth of product range, our project management services, and our specialists’ knowledge and experience mean that we’re able to find the exact solution for each situation, even if it means designing and manufacturing a bespoke item. We’ve got our own plumbers, installers, joiners, and engineers to provide the full service, and we work closely with all parties including Case Managers, Occupational Therapists, the client, solicitors, architects, and main contractors.

This brochure provides a small insight into the wide range of products and services we offer. We have access to products from all over the world, so if you can’t see what you’re looking for, just give us a shout!

CREATING WORLD-LEADING
CARE ENVIRONMENTS.

/ Save time, money and hassle.

KNOWLEDGE & EXPERIENCE

With seating specialists, hoisting experts, and healthcare consultants, we're able to offer excellent advice.

PROJECT MANAGEMENT

With our own project managers, we can ensure the project runs smoothly and on-time for you, and can coordinate delivery and installation dates.

PACKAGE PRICING

As we offer the full range of both loose and fitted care equipment, along with other services, we can ensure you get the best deal by offering reduced package deals.

/ What makes us tick...

With a mission 'To enhance quality of life through innovation', we're constantly moving ahead to ensure our clients get nothing but the best!

We work with clients, contractors, families, case managers and healthcare professionals to create truly accessible homes and provide world-leading solutions to help people live more independently.

INNOVATIVE

We're the pioneers. We're changing healthcare for the better.

FRIENDLY

We're a team of people who love a good laugh. We care about others.

DYNAMIC

We're moving forwards and pushing the boundaries. We're responsive and energetic.

HONEST

We're open and up-front about what we can and can't do. You can trust us for the truth.

PASSIONATE

We love our work, and are excited about the difference we're making to patients and carers across the globe.

/ UltiLift Domestic Lifts

With the UltiLift, your client can enjoy a completely customised through floor lift that's barely noticeable within the room. The lift size and design can all be customised, and with such a wide range of different colours and finishes available, you can ensure that the UltiLift suits the client's needs down to the ground.

THROUGH-FLOOR LIFTS

THROUGH-FLOOR LIFTS

HOW IS THE ULTILIFT DIFFERENT?

The UltiLift works on a hydraulic system that can lift and lower the passenger car in the most peaceful way possible. Using simple oil pressure, the UltiLift has no chain, cabin, or suspension system which makes it quiet and energy efficient.

Unlike other domestic lifts, the UltiLift doesn't need any bulky electronic motor or levy systems installed which saves a lot of space.

The compact design of the UltiLift goes even further than that, and your through floor lift could take up the same floor space as a shower!

COMPLETE CUSTOMISATION

With options available for every budget, the UltiLift can be made bespoke to suit your client's space and your décor. Whereas other domestic lifts don't necessarily blend in, the UltiLift can be made to your specifications so it's completely integrated in the room.

Choose between small, medium, large, and bespoke extra-large sizes to fit the space available. You can also choose between different design collections for various décor schemes and colours.

With four different door styles, several flooring options, and premium interiors, you can really make the UltiLift your own.

THROUGH-FLOOR LIFTS

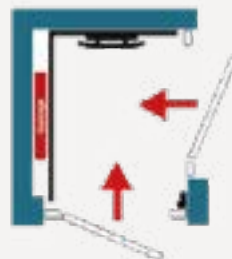

SINGLE DOOR

Enter and exit from the same side.

STRAIGHT THROUGH

Enter and exit from opposite sides.

90° EXIT

Turn left or right to exit.

THROUGH-FLOOR LIFTS

QUICK INSTALLATION

The UltiLift can be easily installed in as little as one day. The lift itself only requires one load-bearing wall to be mounted to with the rest of the lift shaft constructed around it as required.

/ Overhead Hoist Systems

Overhead hoist systems are one of Innova's specialisms. We've worked alongside industry specialists to revolutionise the basic configurations of overhead hoist tracking, and the Airglide360 hoisting track system is the result! To date, hundreds of our systems have been installed in homes throughout the UK.

Systems are designed and installed by our own technicians, so you can be sure of high quality workmanship throughout the project.

MOVING & HANDLING

/ Fully Automatic...

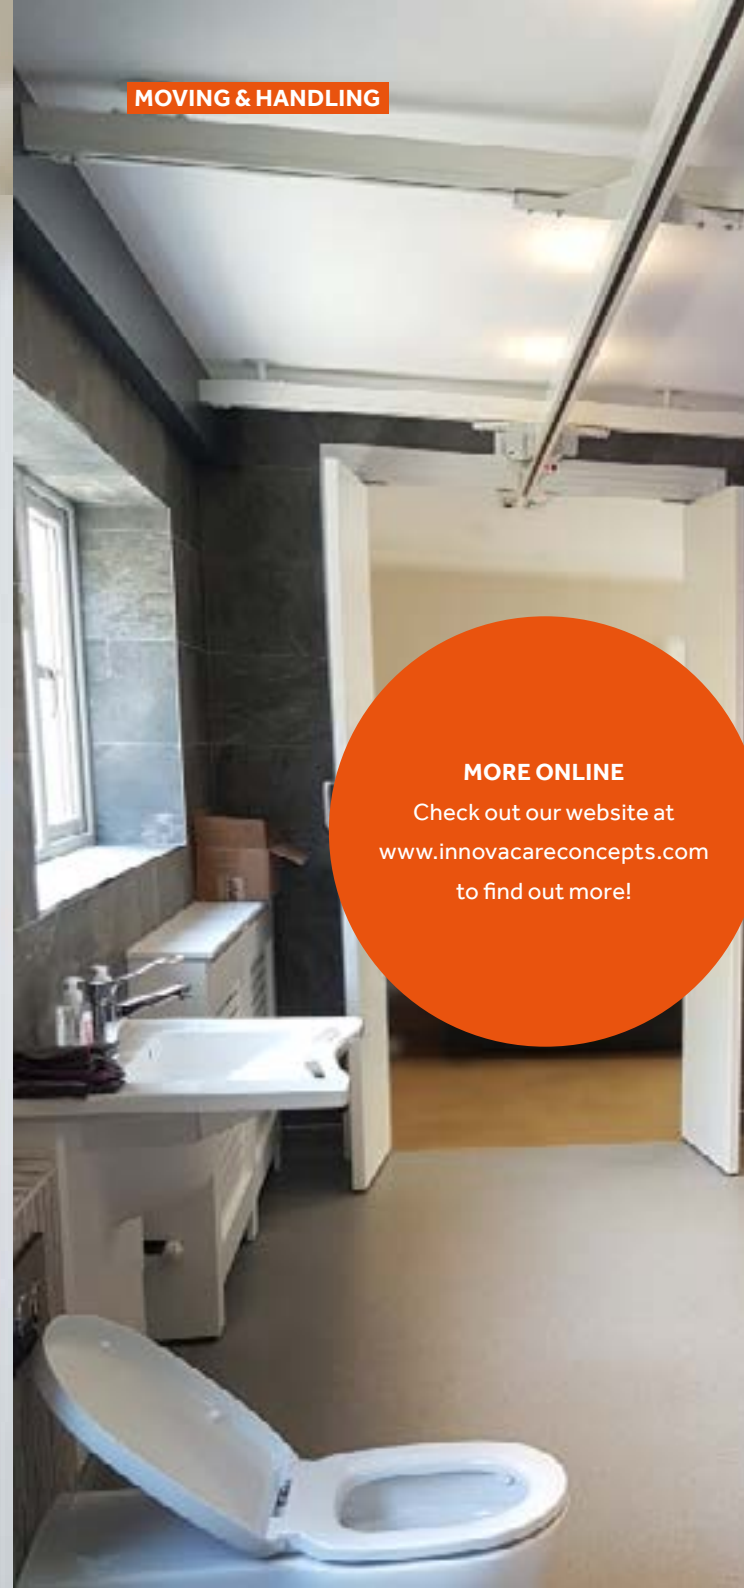

The Airglide360 hoist track system is truly unique. It uses magnets and sensors to make transfers smooth and hassle-free.

If you want to change direction or link two systems together, simply pause for two seconds. The system will know you want to change direction, and will move accordingly, allowing the operator to concentrate on supporting the user.

In short; no more push buttons or pull cords!

**SUITABLE FOR
BARIATRIC CARE**

AirRise hoist units can safely
lift up to 500kg!

/ AirRise Hoist Units

The AirRise® units are the result of many careful refinements and meticulous attention to detail.

Key features on all AirRise® hoist units:

- Battery Protection System.
- Comfort – Both sections of the special twin trolleys steer, meaning transfers through tight corners are smooth and comfortable, and that noise is reduced. The units also feature soft-start and soft-stop technology.
- Spreader bar options provide flexibility to use the hoist in different ways. Switch out attachments for transfers and repositioning.
- Easy to use, easy to charge – The handset is simple and easy to use, and the hoist is charged by just putting the handset into the magnetic wall charger. There is also the option of an on-track charger.

/ Robin Hoist Unit

The Robin is a lifter with a difference – it is the only hoist unit without a spreader bar!

This unique feature has a number of advantages:

- The strap inlet self-adjusts automatically to the size of the client for greater comfort.
- The tapes help with self-hoisting.
- The tapes can be brought to the slings rather than having to pull the slings to the spreader bar.
- The absence of a spreader bar provides the client with a sense of freedom, reducing the fear of being close to obtrusive parts of the lifting equipment. The client has free vision and eye contact with the carer.
- The spreader bar does not get in the way when moving the client in tight spaces.
- The two strap design gives stability during the transfer.

/ Integralift Hidden Hoist

If fixed lifting equipment is required, we've got some good news for you! It no longer needs to dominate the room, as the Integralift is a unique moving and handling solution that folds neatly away into fitted cabinets when not in use.

With a wide range of cabinet colours and finishes, the Integralift is certain to harmonise with any interior, whatever the decor.

To find out more about the inspiring story the Integralift, watch the Integralift video on our website at www.innovacareconcepts.com.

MOVING & HANDLING

MOVING & HANDLING

MOVING & HANDLING

/ Smart 150 Mobile Hoist

The Smart 150 is a revolutionary lifter - the ultimate lightweight aluminium folding mobile hoist.

Folding can be carried out in seconds, and travel bag and travel suitcase options are available, which are ideal for transportation and storage. A four point spreader bar as standard offers the client greater comfort, whilst the lifting range allows a high lift or a very low lift for hoisting from the floor.

MOBILITY & RAMPS

/ Permobil F5 Corpus VS Stand Up

Like other models in the Permobil range, the F5 VS is a truly cutting-edge electric wheelchair. With built-in stable and durable front-wheel drive, the F5 VS can suit any lifestyle.

With the option to stand vertical whilst using the chair, the F5 VS gives the user a new layer of independence and freedom in their positioning. This powerchair also has an excellent suspension system to ensure comfort, and the wheels will automatically adjust as your positioning does!

For compact transportation, the upper section of the backrest can be removed.

/ Permobil F3 Corpus

The Permobil F3 is a compact front-wheel drive powerchair with advanced features and intelligent design. Its size and agility make it perfect for tight spaces like busy city streets, crowded shopping centres and compact apartments.

The platform has a lower, repositioned center of gravity, which greatly improves stability when driving up and down ramps or inclines and has an exceptionally comfortable ride.

The Corpus seating system comes as standard with many clever ergonomic and technological features, such as a gently arced legrest, open armrest design and the UniTrack support system.

MOBILITY & RAMPS

MOBILITY & RAMPS

/ Permobil M3 Corpus

The Permobil M3 Corpus is an advanced mid-wheel-drive powerchair that combines smooth suspension, steering and seating, offering the user a complete mobility solution.

The Corpus seating system is completely customisable, proven to help reduce the risk of users developing pressure injuries and available with five power seating functions and three programmable seat memories.

The M3 Corpus follows your natural body movement, giving you a stable, more comfortable driving experience, so you can sit longer, reach further and do more.

POWER CHAIR SEATING SYSTEMS

Exclusive to Innova Care Concepts are our fully-bespoke seating systems, incorporating a specialist pelvic support cushion and other components to give optimum support and comfort, contributing to the 24 hour postural support plan.

/ Active User Wheelchairs

For more active individuals who rely on wheelchairs to get around all day, look no further than our extensive active user range of wheelchairs.

Our specialists carry out full and detailed assessments for both rigid and folding types, all of which can be custom-made to suit the individual's needs and desires.

KÜSCHALL K-SERIES

TILITE Z SERIES

MOBILITY & RAMPS

MOBILITY & RAMPS

E-MOTION

E-motion is an incredible piece of German engineering and technology - a powered wheelchair add-on which fits to most self-propelled manual wheelchairs, enabling the user to propel themselves with much less physical effort. Each push on the wheel rim is detected by e-motion's intelligent sensors and converted to precisely the required degree of power. They are powered by lithium-ion batteries and motors, both of which are integrated into the wheels.

E-FIX

The E-fix powered wheelchair add-on converts a manual wheelchair into an electric wheelchair with ease, making it ideal for transportation and convenience.

/ Powered Add-Ons

Designed to improve mobility for users and carers, these items aim to simplify everyday wheelchair use and alleviate the physical strain that sometimes comes with using a manual wheelchair.

SMOOV ONE

The SMOOV One powered add-on clicks securely into place on the back of your wheelchair to give you that extra push whenever you might need it.

/ Temporary Ramping

From temporary ramps to semi-permanent models, we offer numerous different options in different lengths and sizes.

PERFOLIGHT COMBI RAMPS

The Perfolight Combi portable channel ramps have proved to be extremely popular, thanks to their versatility. Incorporating both a folding and a telescopic section on these channel ramps enable just one set of ramps to be used up steps and over the threshold the other side.

AEROLIGHT XTRA RAMPS

Fast and easy to deploy, the Aerolight Xtra is a folding suitcase style ramp. With a contrasting colour down the edges of the Aerolight Xtra, the ramp is highly visible and has an anti-slip surface across its width. It's constructed from a special honeycomb aluminium to make it lightweight but with a high weight limit.

MOBILITY & RAMPS

MOBILITY & RAMPS

/ Welcome Ramp System

The Welcome modular ramp system has been carefully developed to be extremely versatile. Our trained engineers install these systems throughout the country.

Benefits:

- Complies fully with approved document M for dwellings
- Very attractive finish
- 10 year design life
- Extremely durable construction, with huge 400 kg capacity
- Gripdeck™ technology - brilliant all weather anti-slip surface
- Powder coated pre-galvanised steel handrails provide a durable yet 'warm to the touch' handrail
- Platforms can be joined together if a greater size is required
- Height adjustable legs can be adjusted to suit ground variations and a huge range of step heights

/ Hydrotherapy Pools

Hydrotherapy pools are another of our specialities at Innova.

All pools are constructed from stainless steel, which has a number of advantages over traditional pool construction, such as ease of cleaning, lower maintenance and purchase costs, higher durability, and better infection control.

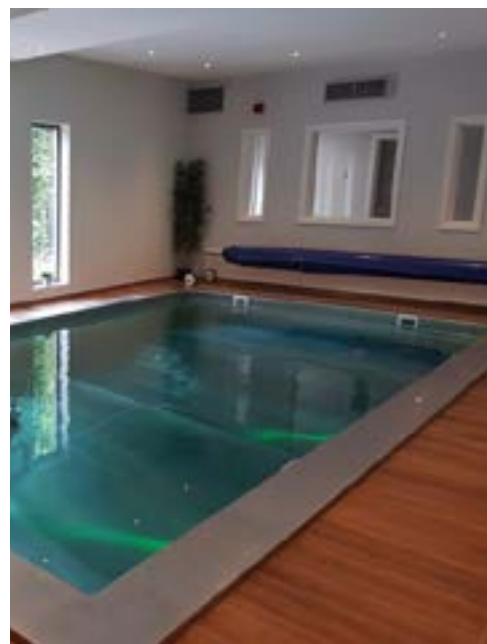

Each pool is bespoke designed for each installation, and there are literally hundreds of different options and features available.

Innova are with you every step of the way, from initial consultation meeting through to installation, commissioning, training, and ongoing maintenance. Just get in touch to find out more!

HYDROTHERAPY

VIDEO ONLINE

Watch the video on
our website at
www.innovacareconcepts.com

HYDROTHERAPY

/ RAZ Shower Chair Range

The RAZ Rehab Shower Commode Chairs are ideal for clients with advanced postural needs, with an adjustable tension fabric backrest, 125mm dual-locking casters, flip-up padded armrests, and an ultra-soft moulded commode seat for added comfort.

RAZ chairs also offer the Ischial & Pelvic Alignment System (IPAS), which allows the commode seat aperture to be comfortably centred around the ischial tuberosities for clients with a posterior or anterior rotated pelvis.

Attendant propelled, self-propelled, tilt-in-space, and bariatric models are available, all with numerous options and accessories.

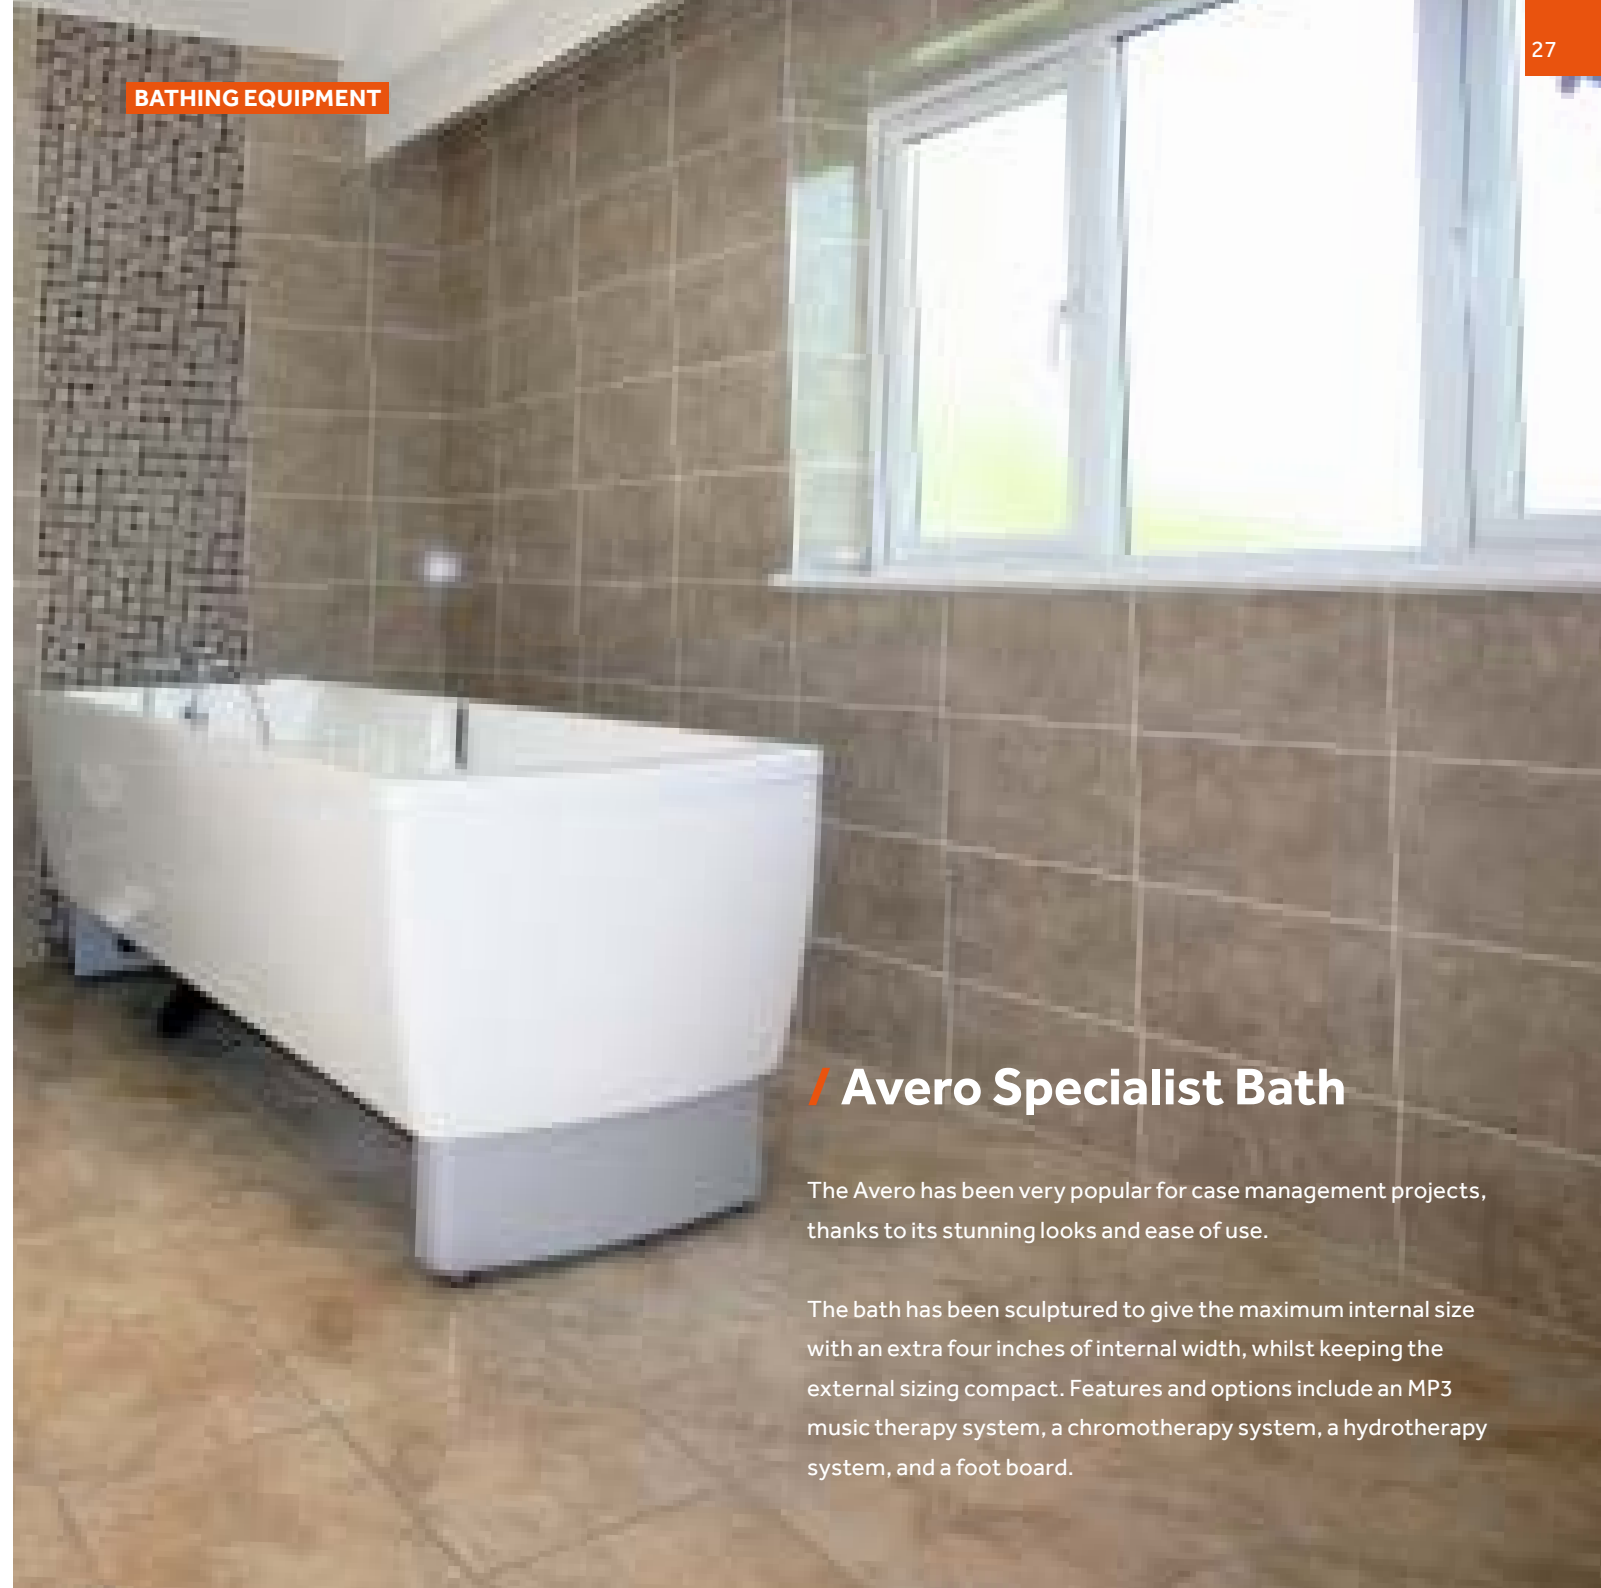

BATHING EQUIPMENT

BATHING EQUIPMENT

/ Avero Specialist Bath

The Avero has been very popular for case management projects, thanks to its stunning looks and ease of use.

The bath has been sculptured to give the maximum internal size with an extra four inches of internal width, whilst keeping the external sizing compact. Features and options include an MP3 music therapy system, a chromotherapy system, a hydrotherapy system, and a foot board.

/ Cocoon Specialist Bath

The Cocoon specialist baths are variable height, and incorporate ergonomic posture management and styling. The special keyhole shape allows the user to immerse and relax, offering more space for the upper body. The tub has deep side walls and a flat floor, providing a secure and comfortable bathing space. The design also provides more working space for carers, making hygiene procedures easier.

BATHING EQUIPMENT

BATHING EQUIPMENT

/ Hi-Lo Washbasins

Our Hi-Lo washbasins are high quality, flexible solutions to provide disabled users with accessible washing facilities.

There are two basin options which fit onto the height adjustable bracket system - a standard basin, or an ergonomic basin, which includes a concave front edge to allow room for the user's legs underneath the wash basin. Three different bracket options are available – manual height adjustment, hydraulic height adjustment, and electric height adjustment.

/ Nursing Bench 3000

This stylish and popular wall-mounted showering and nursing bench features an integral water collection tray and adjustable head support, and is ideal for case management projects.

With a user capacity of 200 kg, the Nursing Bench 3000 is available in height adjustable or fixed versions.

BATHING EQUIPMENT

BATHING EQUIPMENT

/ Baleno Body Dryer

Placed on the wall of the shower, the Baleno Body Dryer completely dries the body after a few minutes, with a constant stream of warm air. A motion sensor ensures a hands-free operation, whilst functions such as temperature can all be adjusted to suit.

It's the most efficient body dryer on the market, with a patented curved 23 air vent column to ensure a perfect dry at a uniform temperature from head to toe.

/ Aquaclean Mera Wash/Dry Toilet

The Aquaclean Mera shower toilet combines all the features of a conventional WC and bidet with the comfort of warm-air drying.

A simple to use shower, drying and air purifying operation makes for a cleaner and more hygienic experience that is virtually hands-free. Fresh water cleaning at body temperature allows for a much more pleasant and comfortable sensation than conventional toilet tissue. Options include floor-standing or wall-mounted models, and accessories such as infra-red sensors are available.

BATHING EQUIPMENT

SEATING

/ Lento Care Chair

With its name meaning 'flexible' in Latin, the Lento can cater to around 80% of those needing a care chair. The seat is depth, width, and height adjustable to suit a variety of postural presentations. What's more, the arms and legrest can also be repositioned for extra comfort and support, and the back height and cushions can be changed with ease.

The Lento can easily be customised with a removable seat and detachable wings for varying back support. It also has built-in a locking tilt-in-space function that will help keep the individual comfortable whilst sleeping or relaxing in the chair, whilst also minimising the risk of developing pressure injuries. Backrest recline and articulating legrest elevation also come as standard, and there is a choice of manual or electric models.

/ Liberta Bed

The Liberta profiling care bed has built-in mesh sidepanels to allow users to see through them with ease with no feeling of entrapment.

These sidepanels can be switched from a sliding fabric courtesy panel to a wooden panel – or vice versa – in just 30 seconds. Simply pull up the bed guard rails when they're needed or slide them down when they're not necessary. They can be stopped at any height, giving the individual a range of options, and they're strong enough to use as a handle to get out of bed! The Liberta gives the user the freedom to adjust their own courtesy panels for assistance and safety when needed.

BEDS & MATTRESSES

BEDS & MATTRESSES

LIBERTA
FREEDOM REDEFINED.

Right:
Upholstered sides and ends add an extra touch of class to the Liberta®, creating a homely atmosphere and adding a wow feature to any care environment.

Left:
The Liberta®'s length adjustment is incredibly quick and easy to do, and requires no tools. The mattress platform can be extended by 5, 10, 15, or 20 cm in just seconds! A small infill panel is available if required.

/ Tenero Double Bed

When it comes to a custom-made height adjustable bed, look no further than the Tenero.

Never before has a bed been so versatile, so adaptable, and so personalised for the user. The Tenero Double model has a stylish design to hide the bed mechanism, and can be supplied with a single full-width action, or with two separate actions, allowing couples to control their own side of the bed with ease.

BEDS & MATTRESSES

BEDS & MATTRESSES

STANDARD FOAM MATTRESSES

Sometimes it's just something simple that's required. And the construction of our foam mattresses are just that: simple. But there's more than meets the eye. The materials and foam cutting methods are carefully designed to give maximum comfort, whilst being easy to clean.

/ Somlent Serene Mattress

The Somlent® Serene is the world's first 3 in 1 alternating hybrid mattress.

Not only that, but when the pump isn't attached, it's not just a foam mattress – the cells are filled with both foam and air, allowing the air to flow freely from cell to cell, and contouring freely to the patient's body. When the patient requires greater pressure care, just connect the pump to step the mattress up to an alternating surface. High comfort ratings from patient trials and a high waterlow score of 19 to 22 provides the final proof that this hybrid mattress is like no other.

/ Somlent Air Egg Mattress

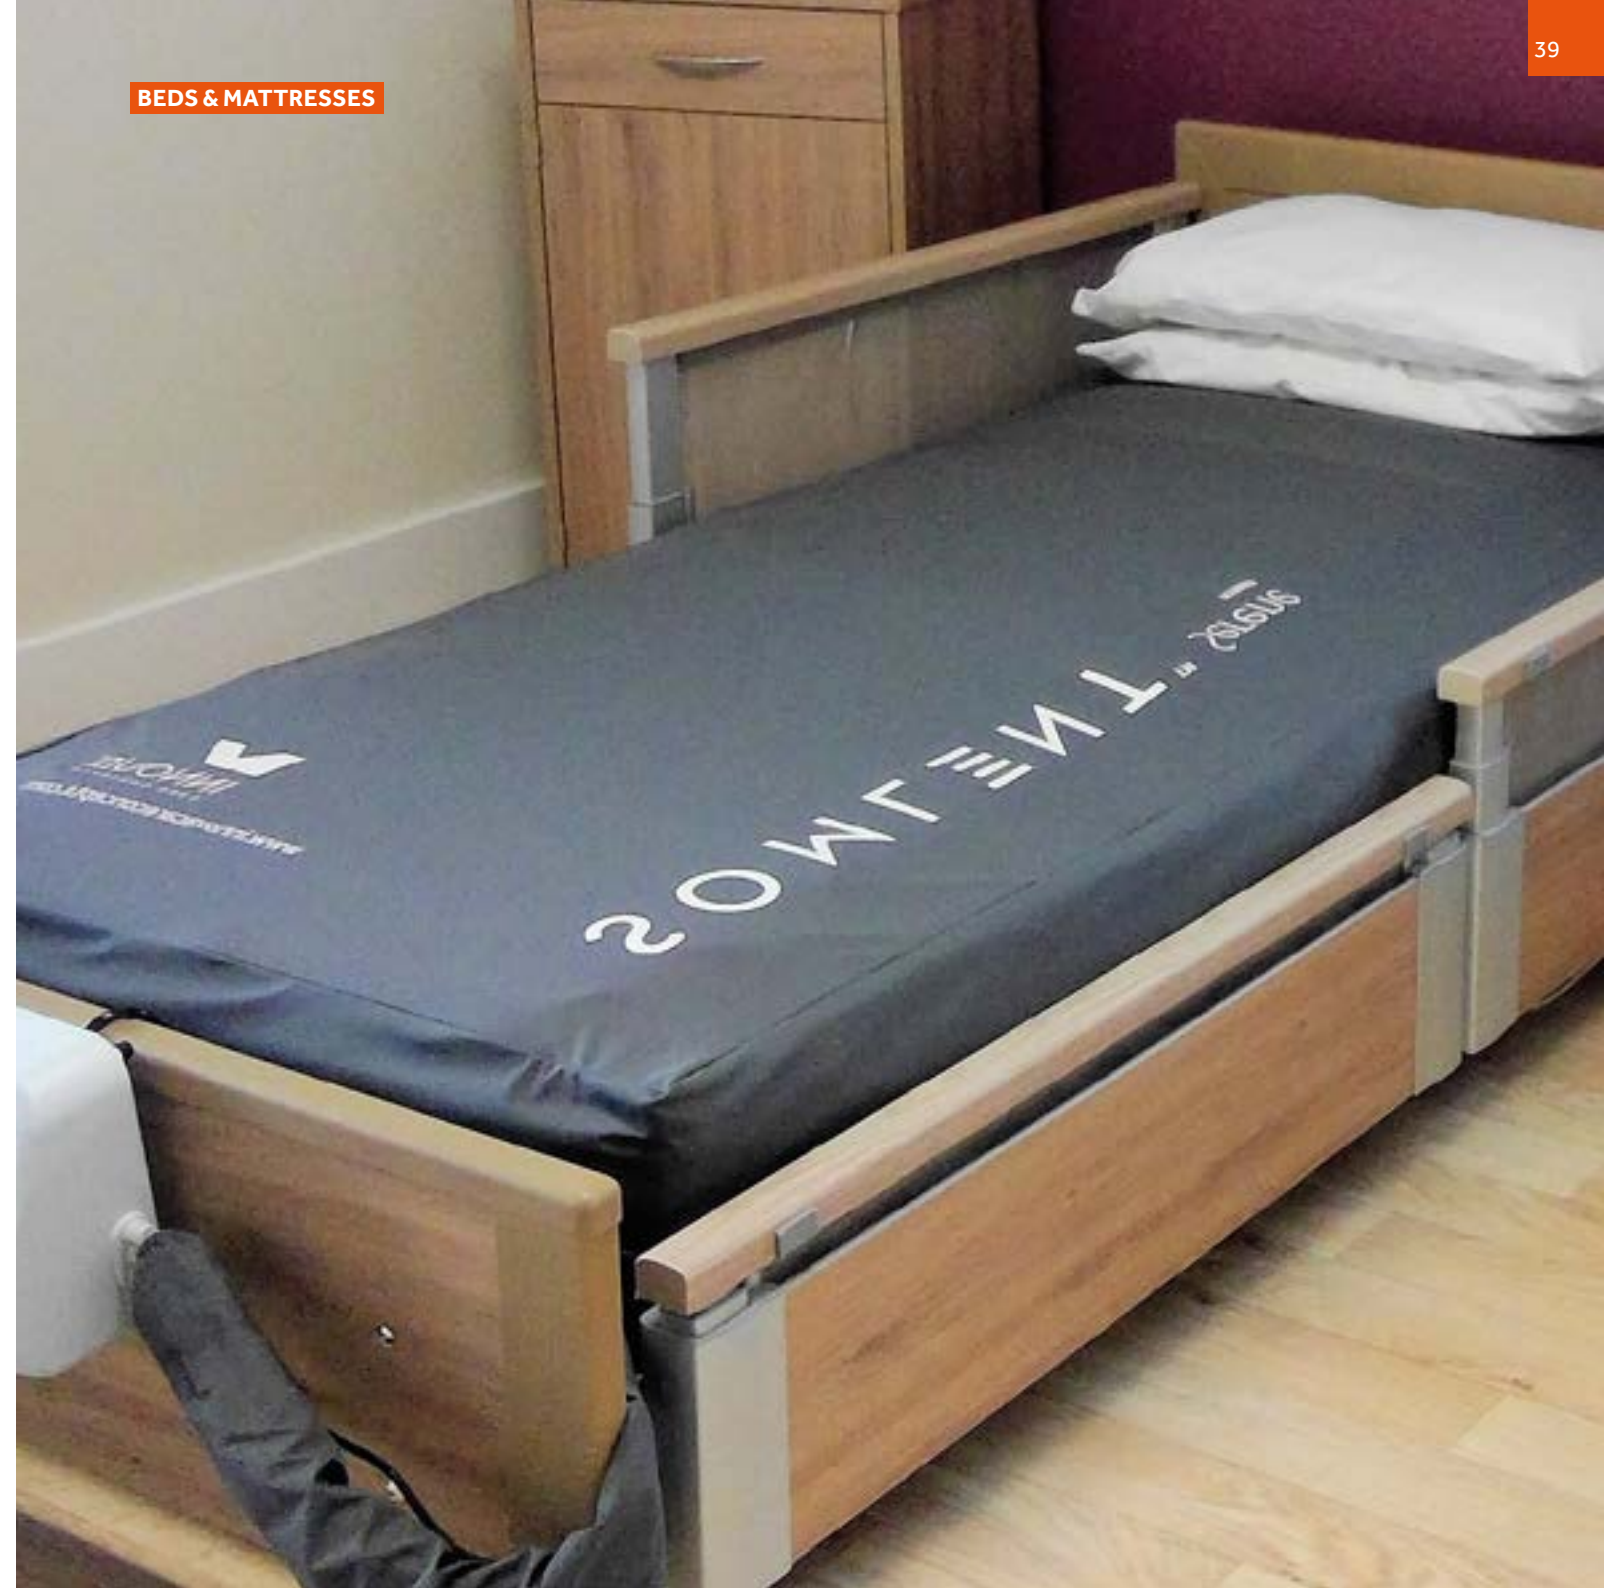

The Air Egg combines the latest pressure care technology with comfortable settings to create a completely dynamic mattress that can provide comfort and care for a plethora of patients.

What makes the Air Egg truly unique is its built-in alternating pressure intensity levels. This gives carers the option to change the amount of pressure put in each cell of the mattress, therefore making pressure relief more comfortable than traditional air mattresses.

BEDS & MATTRESSES

BEDS & MATTRESSES

/ Lift & Bathroom Installation

One of our clients, Aidan, was unable to move between floors in his home. Accessing the bathroom was difficult and Aidan had to receive lots of support from his parents and carers to carry out everyday tasks.

After several assessments and home visits, our case management team were able to recommend a specialist solution tailored to Aidan's needs. The goal was to help Aidan to manage daily tasks for himself and allow for rehabilitation at home, whilst maintaining the comfortable look and feel of the family home.

We worked closely with Aidan, his parents and his Occupational Therapist to install a range of bespoke fitted equipment - including a wash/dry toilet, height-adjustable sink, shower chair, body dryer, and through-floor lift complete with a custom fairytale inspired interior!
