

VersaTech 1100 ULB with VersaDrive

- The only bariatric bed in the world that goes to 21cm with a maximum weight capacity of 500kg, helping improve patient mobility, comfort and independence.
- Fully width-adjustable side panels to accommodate different mattress sizes, providing flexibility to be used as a standard wards bed and can assist with patient care without causing injury to staff.
- VersaDrive motorised assistance system enables patients to be easily moved with one push of a button, reducing the risk of strain for caregivers.

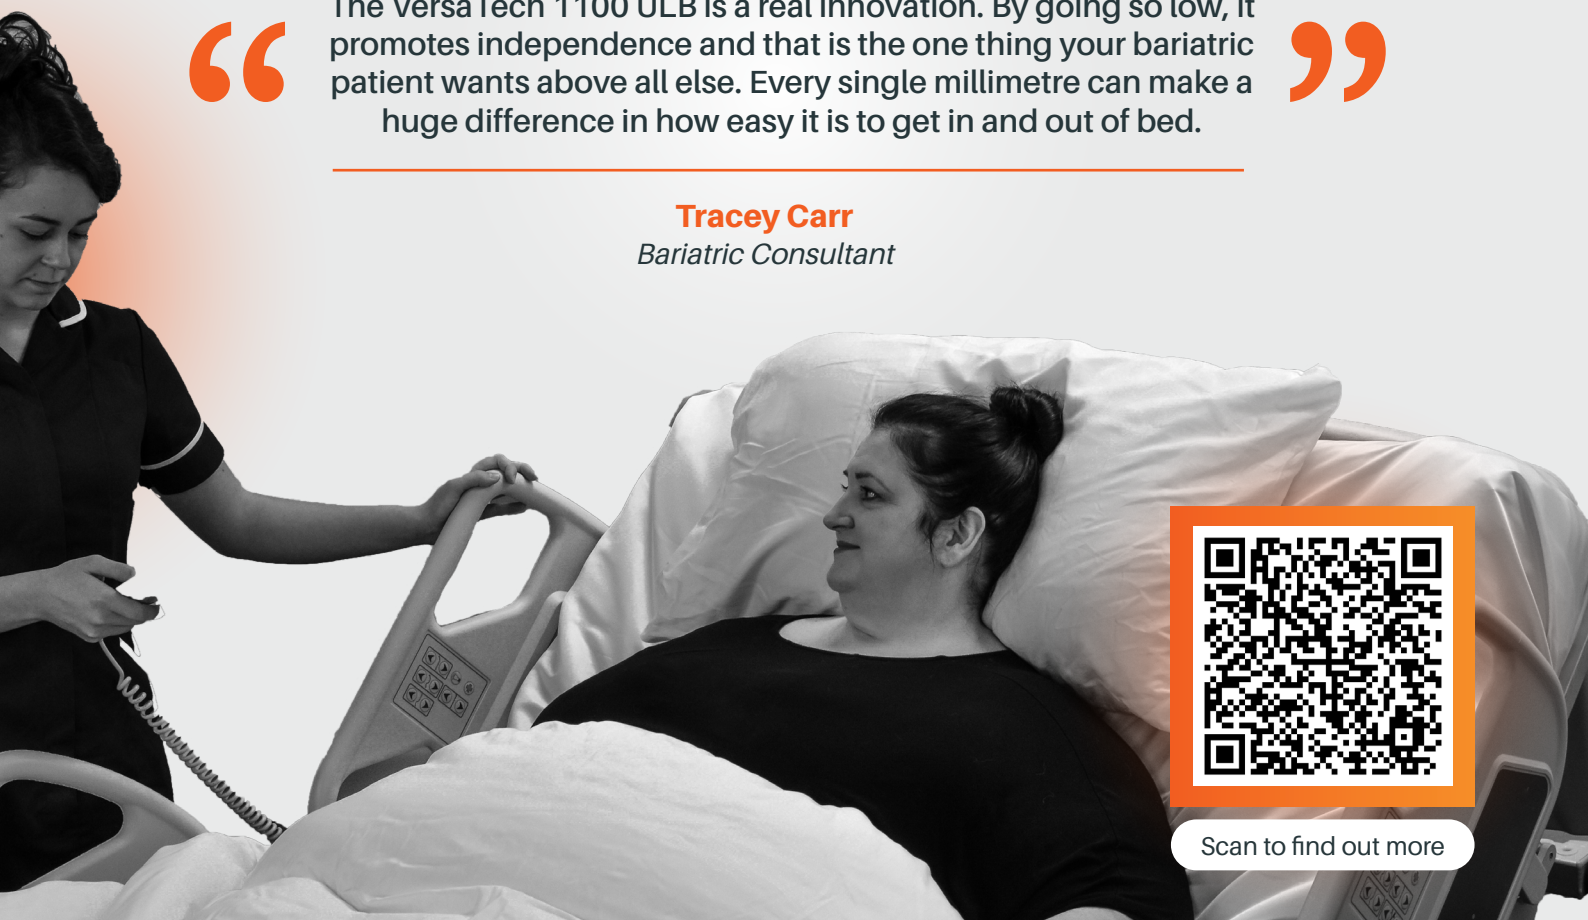

“

The VersaTech 1100 ULB is a real innovation. By going so low, it promotes independence and that is the one thing your bariatric patient wants above all else. Every single millimetre can make a huge difference in how easy it is to get in and out of bed.

”

Book Your **FREE** Demo

To enable you and your team to see first-hand the unique features of the VersaTech 1100 ULB, we'll bring a demo bed to your ward on a day and time of your choosing. You can also arrange a free trial, so you can test the bed to see how it will support your patients and staff.

Our demo includes:

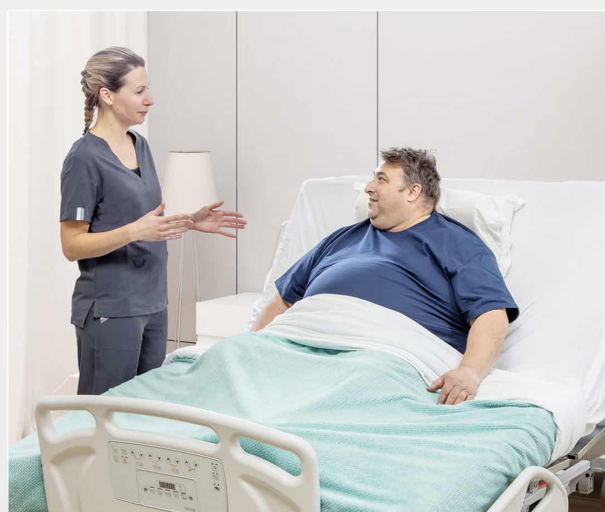

Testing out the innovative VersaDrive system, so you and your team can feel how easy it is to push the bed with weight between wards and on slopes.

Interactive control board demonstration, testing how the adjustments and bed functions improve patient and staff safety.

Discovering how the fully-adjustable side panels provides flexibility for your department, enhancing patient care and reducing cost.
