HIDDEN HOIST

**How do you make your
bedroom and bathroom
more accessible without
it looking clinical?**

With the **Integralift** hidden hoist,
you have the perfect blend of
functionality and style.

Hidden Hoist

This innovative system can be folded completely away into a cupboard, making it an incredibly subtle piece of patient handling equipment.

Available in a range of finishes, the Integralift blends in perfectly with your existing décor or upholstery. It's tasteful, uncluttered, and welcoming.

Whether it's for a private home or a hospice, this hoist system offers a variety of cabinet colours and styles, different handle types and different configurations, enabling you to customise the design to suit your needs and taste.

Easy To Use

The Integralift folds out of a cupboard to become a bed hoist, transferring to chairs or commodes or vice versa. Simply open the cupboard and pull out the arm of the hoist to get it set up. Designed to save caregivers' time during transfers, the lifter and sling can be kept permanently in place in the cupboard, making it an ideal piece of home care equipment.

Fully customisable, the Integralift can be integrated as a bedhead hoist unit, or it can be fitted with wardrobes, bedside cabinets, lockable drug storage compartments, patient lights, ward screens, and even foldable beds for friends and relatives.
