

Specialist Baths

Overview

Our innovative bath range is designed to deliver a safe, dignified, and comfortable bathing experience in both multi-user and domestic care environments. Crafted with high-quality manufacturing and modern design, each bath is available on short lead times and can be customised to meet specific user needs and aesthetic preferences.

From size and style to additional features, our baths offer flexible options that allow them to blend seamlessly into any bathroom setting without compromising on functionality. With easy-access designs and ergonomic support, they enhance comfort, promote independence, and help carers work more efficiently, creating a calming and therapeutic environment for every user.

Baths

Comfortline

The Comfortline Bath combines elegant, modern design with electrically height-adjustable settings, offering a spa-like experience for users while minimising physical effort for carers during bathing routines. With its smooth, quiet lift function and compatibility with a range of accessories, including air spa, autofill, and temperature-controlled tapsets, it delivers both comfort and functionality.

TR 1700

This height-adjustable bath optimizes limited spaces without compromising efficiency. Available in various colour combinations, it offers a safe and relaxing bathing experience for both users and caregivers. Its adjustable feet enhance safety on uneven floors and facilitate easy cleaning, making it a versatile choice for efficient and comfortable bathing in restricted environments.

Swing Bath

With its integrated side-entry seat and swing-out mechanism, the Swing Bath eliminates the need for manual lifting, making transfers safer and easier for both carers and users with limited mobility. It promotes dignity and reduces strain, with optional features like autofill, air spa, and temperature-controlled tapsets for added comfort and safety.

Spaceline

The Spaceline is a freestanding, height-adjustable bathtub designed to provide a relaxing and satisfying bathing experience. Its extra width accommodates plus-size users and offers additional space for users who want to practice movement within the tub. The Spaceline is accessible from either side, and its ergonomic design and efficient bathing cycle are advantageous for both users and carers.

Accessories & Options

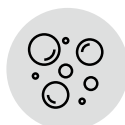

Music

Add integrated Bluetooth speakers for a soothing, spa-like experience during every bath.

Shower Holder

Select either a flexible handset or a fixed shepherd's crook holder to suit different care needs.

Air Spa

Enjoy gentle relaxation with an optional air spa system that promotes circulation and comfort.

Bath Supports/Padding

Enhance comfort and positioning with customisable bath supports and soft, wipe-clean padding.

Colour

Customise your bath to match any aesthetic with a range of colour finishes available.

Foot Rest

Optional foot rests provide added stability and support during bathing.

Cleaning Hose

A convenient cleaning hose makes maintaining hygiene quick and effortless.

Handles

Opt for integrated handles or a clean, handle-free design depending on user needs.

TMV3 & TMV2 Tapsets

Choose from TMV3 or TMV2 tapsets for added safety and precise temperature control.

Shower Hose Attachment

A shower hose attachment allows for easy rinsing and versatile bathing care.

Autofill

Save time with the autofill feature that ensures the bath fills to the perfect level every time.
